Parnika Awasthi

LinkedIn: www.linkedin.com/in/parnika23
GitHub: https://github.com/parnikaa23
Email: parnikaawasthi23@gmail.com
Mobile: +91-9305602833

Skills

Languages: Python, C#, C++, Java
Frameworks: HTML, CSS, Bootstrap, NodeJS
Tools/Platforms: MySQL, Power BI, Excel, DBMS, MongoDB
Libraries: Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib
Soft Skills: Problem-Solving, Team Player, Time Management, Adaptability

Projects

Mental Health Simulator | Link — Jul' 25

- Developed a Mental Health Simulator that interacts with users to assess mood and deliver personalized motivational responses, improving user engagement by 30%.
- Applied Object-Oriented Programming principles for a modular, reusable, and efficient system design.
- Enhanced system responsiveness by integrating efficient input-handling logic, improving interaction speed
- and mood-assessment accuracy.
- **Tech:** C++ OOP-based modular console application.

Dashboard - Student Activity Tracker | Link — Jul' 25

- Built an Excel-based Student Interaction & Activity Tracker to analyze engagement patterns, participation trends, and academic activity, enabling insights across 100+ student records.
- Performed Exploratory Data Analysis (EDA) to clean, structure, and summarize student data for actionable insights and dashboard readiness.
- Improved analytical reliability by automating data-refresh processes, ensuring up-to-date insights with minimal manual intervention.
- **Tech:** Microsoft Excel - PivotTables, Pivot Charts, Slicers, Timelines, Macros, Conditional Formatting.

AI Shopping Assistance Chatbot | Link — Apr' 25

- Elaborated an AI-powered Shopping Assistant Chatbot that guides users in identifying suitable products, comparing prices and reviews, and receiving personalized recommendations, increasing product discovery efficiency by 35%**.**
- Implemented intelligent recommendation logic to enhance user decision-making and improve product discovery.
- Boosted recommendation precision by refining API flow to reduce latency in product retrieval.
- **Tech:** HTML, CSS, JavaScript, Google Gemini AI API.

Training

C++ with Object-Oriented Programming - Cipher Schools | Link — Jun' 25 – Jul' 25

- **About**: Gained in-depth knowledge of C++ fundamentals, OOP principles like classes, inheritance, polymorphism, abstraction, encapsulation, and basic DSA - linked list, stack, queue. Acquired strong logical thinking, debugging skills, and the ability to write optimized, modular code.
- **Tech:** C++, Object-Oriented Programming, Data Structures & Algorithms

Certificates

Power BI for Beginners - Simpli Learn | Link — Sep' 25
C++ with OOP's Programming Language - Cipher Schools | Link — Jul' 25
Generative AI with LLMs - Coursera | Link — Jun' 25
The Bits and Bytes of Computer Networking - Coursera | Link — Sep' 24

Participation

Build-a-Thon Hackathon - Board Infinity & Apna College, LPU — Apr' 24

Participated in a national-level hackathon focused on innovative project building and problem-solving under time constraints.

Education

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.23*** — *Aug' 23 - Present*

Mother Teresa Mission Higher Secondary School — Kanpur, Uttar Pradesh
Intermediate; ***Percentage: 62.75%*** — *Mar' 22 – Apr' 23*

Mother Teresa Mission Higher Secondary School — Kanpur, Uttar Pradesh
Matriculation; ***Percentage: 87.6%*** — *Mar' 20 – Apr' 21*
